

Product Information

Analysis of Student Work

The Analysis of Student Work involves a careful, collaborative examination of new teacher's students' work to better understand their learning needs and then to determine how best to address those needs. With their mentor, new teachers select an assignment that has the potential to offer important information about their students' learning. The Analysis of Student Work tool guides the mentor and new teacher through the process of analyzing student work samples, understanding specific learning needs, and then identifying teaching strategies that will help differentiate instruction.

The basic steps in the Analysis of Student Work are:

1. Preparing
 - determine standard area
 - clarify expectations for student work
 - identify assessment criteria
2. Sorting and Analyzing
 - analyze student work samples
 - identify patterns and trends
3. Identifying Learning Needs
 - clarify students' instructional needs
4. Differentiating Instruction
 - generate strategies
 - identify next steps
 - build accountability

Cost:

25 sets of NCR Forms
in spiral bound book with tear-out pages \$20
