Continuum of Teacher Development

How do beginning teachers assess their professional development? How do they identify their strengths and areas for growth and make informed decisions about their practice? The *Continuum of Teacher Development* is a self-assessment tool used in a formative assessment process. It is designed to support new teacher development in collaboration with a mentor.

The *Continuum* is organized around the following professional teaching standards.

- Engaging and supporting all students in learning
- Creating and maintaining an effective environment for student learning
- Understanding and organizing subject matter for student learning
- Planning instruction and designing learning experiences for all students
- Assessing student learning
- Developing as a professional educator

The *Continuum* describes different levels of practice or knowledge along various stages of development for each of these standards. Beginning teachers locate the descriptors that best define their current classroom practice and then use them as a guide for self-reflection, assessment, and professional goal setting.

The *Continuum* has proven to be a powerful tool as beginning teachers identify their areas of growth, move from assistance to autonomy, and become lifelong learners.
